

Need Support for the Petri-Dish Known as School?

If back to school means back to sniffing, sneezing, and coughing Biotics Research has some great formulations for children. For some children, taking vitamins or supplements in pill form can be challenging. So here are a few alternatives that work really well:

B12-2000™

B12-2000™ has long been one of Biotics Research's best sellers and for good reason; not only do they offer an ideal combination of vitamin B12 (2,000 IU), folate (800 mcg) and vitamin B6 (2 mg), but are readily absorbable and taste great. It is designed to be dissolved in the mouth, not chewed. This allows the nutrients to bypass digestion and enter directly into the bloodstream. This is one naturally flavored lozenge that my own children love and ask for, and I know yours will too.

Aqueous Multi-Plus™

This liquid, multiple vitamin has natural flavorings of pineapple, mango, and orange. This is a great dairy free, multivitamin to give to children and seniors who have a hard time with pills. Since vitamin B12 is not stable in liquid form with other B vitamins, we recommend this supplement be combined with the B12-2000™.

Biomega-3™ Liquid

This all-natural marine lipid concentrate is derived from anchovies and sardines. Sourced following the strict standards of the European Union (EU), this supplement supplies 1400 mg of Omega-3 fatty acids per dose, including 740 mg of EPA and 460 mg of DHA. Omega-3's are rapidly becoming an important tool in mainstream medicine. There are health benefits for persons of every age. There is also conclusive evidence that they protect against heart disease and lower triglycerides, and have many other benefits. For optimal shelf life, refrigerate product after opening.

Bio-D-Mulsion Forte®

Bio-D-Mulsion Forte® is emulsified vitamin D3 (2,000 IU per drop) enhanced for absorption and utilization. One drop daily increased 25(OH)D concentrates in vitamin D deficient children 202% in six weeks, tripling 25(OH)D levels. While the importance of vitamin D for musculoskeletal health is well documented, its importance in numerous other aspects of health are now recognized. For small children or a milder dosage of vitamin D, consider Bio-D-Mulsion® at 400 IU per drop.

BioDophilus-FOS™

BioDophilus-FOS™ is a probiotic supplying Lactobacillus acidophilus (DDS-1), Bifidobacterium bifidum, and Fructooligosaccharides in powder form. Mixes easily in water, or beverage of choice. Store at room temperature to avoid clumping.
